PATTERN OF COURAGE

HERE are in this and every community men and women who have the reputation of chronic grumblers. Nothing pleases them. The smallest thing that upsets them or runs counter to their expectations brings forth a complaint, a moan or a grumble. More often than not they are people who have been endowed with their of kindness. eideration, material forts and divine blessings. But they grumble because in their selfishness, they fall just short of having their own way all the time.

And there are others, here and elsewhere, who have the reputation of never release. grumbling whatever their missortune. We are thinking today of two in particular who have set a pattern of courage to inspire thousands all over the world.

are both young men, both medical doctors, but they have something else in common. Both are dedicated Christians and both are dying of cancer, break. We refer to Dr Tom Dooley, the famous jungle doctor of Laos, and Dr Howard Guinness, an Anglican clergynian recently appointed to wealthy parish in Sydney.

Dr Dooley, when he was recently in Hongkong, told a government. maining to me. I have lost ! tiene, and villification. almost 15 lbs but my spirit is fine, there is nothing that could touch my spirit. You will always possess happiness if you seek and find out how to serve. I have no intention of lying hospital bed and withering away. There is much to do in this world. I must continue to pm today.

few unbelieving hours of Dr Armando Florez Ibarra. realising what lay ahead his companionship with the great number of others who have found themselves in the same boat. Unable to speak above n whisper because of the state of his throat he tape recorded a message-wind congregation. "I want to share with you something very personal in my life. have been given the rare honour of joining the large, lonely, frightened group of sufferers in the world."

ND in joining this group he also became aware, like Dr Dooley, of the need to live not only one moment nt a time, but to live it as though it were all moments, and that is what they are both calmly determined to do as long as there is life and strength left in them to stand up. Both are not alone in determination and cheerfulness. Many of us have friends or relatives who, similarly placed, have shown qualities of nerve humour which disarmed those about thom foel and, made ashamed of their own grumbles and smaller

worrios. It is the will not morely survive but to live fully and get on, with the job and Counters of Rosse. without . fuss, the will to beat one's apprehensions and make the best of it, which is the mark of peoexample, of a courage that some have and many need. in a shining reminder that thoro is more to living than monning about it.

London, Jan. 3. South Africa's severe drought cut total offerings of wool in the July-November period last year to 445,000 bales, a decline of 8 per cent against the 1959 figure, the International Wool Secretariat said today.

The selection of wooks remained average to good at all ports, although clips from the northwestern Cape Province showed the effects of the drought. Total weight of wool sold was 118 million pounds which realised £18.5 million against £129 million, yielding £23 4015 million in 1959.—UPI.

The Federation and Singapore have considerably increased their imports from the United States as a result of the dollar import liberalisation policy adopted by both territories early last year. During the first 10 months of last year, the value of American imports was M\$150.2 million,

compared with M\$123.2 million

over the same period of 1969. But of this total only 5.4 per cent or M\$8.5 million worth of American goods were imported via Hongkong, compared with 38 per cent or M\$47 million in the first 10 months of 1950. Large increases of American

imports were recorded for cotton fibre, tractors and industrial machinery. Nearly M\$3 million worth of American cotton fibre was imported into Federation and Singapore in the period, an increase of M\$2.5 million.

The Federation and Singapore also bought more fruit, manufectured and unmanufactured tobacco, medicines, chemical products, paper and paper boards, iron and steel power generators and electrical equipment from the United States. **EXPORTS**

London, Jan. 3. A cabin cruiser from one of a set of "buildher-yourself" kits produced by a U.K. firm is to be constructed by boat building apprentices at the International Boat Show to be held in London this month.

The firm has been specialising in the rauduction of boat kits for more than ten years, and offers a range of 13 designs, from small sailing dinghles which can be cravled on the roof of a car, to sturdy eabin cruisers. Some 'al the world's leading dorigners, including Uffa Fox, Ian Prootor The state of air traffic conand Jack Holt, are responsible for the small salling craft.

The cabin cruiser to be built is one whose design has achieved great popularity in the U.K. It can be built to any length between 19 and 26 feet and the owner can, if ho Hongkong consisted mainly of wishes, fit any type of cabin

The Port Glasgow yard of Lithgows Ltd., is to build a cargo ship of some 13,000 tons deadweight for the carriage of dry cargo,

The ship has been ordered by the firm of H. Clarkson and Company as sister ship to the motor vessel Clarkspey launched a year ago and commissioned this year. The contract has been placed at a fixed price of £1,058,000 for delivery in December, 1962.

The Charkspey was engined by the Greenock, firm of John G. Kineaid and Co. Ltd., with a dieset engine of the Bur-meister and Wain type and it is likely that the new vessel will be similarly engined and will be of the same high standard of finish in accommodation as the sister ship.--LPS.

WAYWARD GIRLS

SCHOOL FOR

By Gordon Hung

Singapore, (By Airmail). The Singapore Government is completing details of two important schemes to meet the problem of wayward girls in the State.

Scheme No. 1 is the establishment of a girls' approved school for juvenile delinquents who have been involved in prostitution and triad society activity.

Scheme No. 2 is the setting up of a hostel to house those girls who on their release from present rehabilitation centres are inclined to resort to their old ways of life, DISCIPLINE

The projects are expected to cost nearly \$140,000 and will be ready by the end of the

present, juvenile delinguents involved in stitution are being rehabilitated at the Mount Emily Girls' Home. But girls who have been associated with gangsters, thefts and robberies are also

rehabilitated there. The Government feels that this latter type of girl can have a bad influence of the former type so under the new scheme, girls with triad society connections are to be transferred to the new school which will have stricter discipline.

The second new school will be for thece girls who fall into bad company once they, are discharged from the Mount Emily Home.

SHORTS

As for the shorts and slacks in offices and shops, I only wish I could recall the name of the U.S. Air Force general who clamped a ban on these in the PX's and clubs on Okinawa. He should be made Under Secretary of State for powers of arrest and punishment for all women found wearing slacks or shorts outside

the confines of their own homes. As all evidence points to the American male's deep preoccupation with "vital statistics," and that his urges are regulated by the findings of a slide rule or measure tape, it seems all the more remarkable that he'd tolerate n massive assault by the womenfolk on his cherished dreams.

The men should band together and stick to the motto "If You Don't Measure Up. Cover Up!" There'd be a run on the gunny-sack market if they did.
